

Carbon Reduction Commitment

At fonemedia, we are committed to reducing our environmental impact and contributing to the global efforts in mitigating climate change. As part of our sustainability strategy, we recognise the importance of measuring, managing, and reducing our carbon footprint. We are fully dedicated to continually lowering all our applicable emissions, ensuring that we operate in a more environmentally responsible manner.

Our commitment is to actively reduce our carbon footprint on an annual basis. Through a comprehensive approach, we will identify opportunities to minimise energy consumption, reduce waste, and implement sustainable practices across our operations. By setting measurable goals, we aim to continuously improve our carbon reduction efforts and meet our targets year after year.

As part of our commitment, fonemedia will publish an annual report detailing the results of our carbon reduction initiatives. This transparent reporting will include a breakdown of our carbon emissions, the steps we have taken to reduce our environmental impact, and the progress we have made towards our reduction goals.

We are fully dedicated to promoting sustainability within our operations and throughout our value chain. As part of this commitment, fonemedia will engage with stakeholders, including employees, customers, and partners, to encourage the adoption of environmentally responsible practices that align with our goal of reducing our carbon footprint.

By committing to reduce our carbon impact annually, we are not only helping to protect the environment but also fostering a culture of responsibility, innovation, and collaboration at fonemedia. We recognise that while our efforts will evolve and adapt, our commitment to sustainability remains unwavering. Together, we can make a lasting positive impact on the environment for generations to come.
